<b>1. Equipment Type:</b> Choose the equipment being installed; if more than one system, use another CF-1R-ALT-HVAC for each system. <b>2. Minimum Equipment Efficiencies:</b> 13 SEER, 78% AFUE, 7.7HSPF for typical residential systems.					
<b>HERS VERIFICATION SUMMARY</b> Listed below are four HVAC alteration Options. The installer decides what work is being done and picks one of the appropriate Options. Each Option lists the HERS measures that must be conducted. A copy of the forms shall be left on site for final inspection and a copy given to the homeowner. At final, the inspector verifies that the work listed on this form was in fact the work completed by the installer. The inspector also verifies that each appropriate CF-6R and registered CF-4R forms (no hand filled CF-4R allowed) are filled out and signed. <b>Beginning October 1, 2010, a registered copy of the CF-1R and CF-6R shall also be on site for final inspection.</b>
